

Грамматика

Program = { Definition }, Expression ;

Definition = "let", id, "=", Expression ;

Expression = "\", id, { id }, ".", Expression
| Application ;

Application = Term, { Term } ;

Term = id
| "(", Expression, ")" ;

id = letter, { letter | digit | "_" } ;

Примеры вывода

1. $\lambda x y. x$

- $Expression \Rightarrow \lambda id(x) \{ id(y) \}. Expression$
- $Expression \Rightarrow Application \Rightarrow Term \Rightarrow id(x)$
- **Результат:** $\lambda x y. x$

2. $x (y z)$

- $Expression \Rightarrow Application$
- $Application \Rightarrow Term_1 \{ Term_2 \}$
- $Term_1 \Rightarrow id(x)$
- $Term_2 \Rightarrow (Expression) \Rightarrow (Application) \Rightarrow (Term_3 Term_4)$
- $Term_3 \Rightarrow id(y), Term_4 \Rightarrow id(z)$
- **Результат:** $x (y z)$
